

By far the easiest way is to log in gitHub account:

1. Click to your repository {for example yourUsername/yourRepository for example mbaric/test}
2. Then in the main toolbar of github click on **Settings**
3. Scroll to the bottom of the page and you will find **Delete this repository button**
4. When you click it another **pop up** will appear here you need to **type in the name of your repository** and click on the button below which says: **I understand the consequences, delete the repository**
5. If you are having trouble to do it, below are the images that can be checked...

*2017-02-04 - GitHub changed the UI again, Here are new images :)*

Combine all commits from the head branch into a single commit in the base branch.

☒ Allow rebase merging

Add all commits from the head branch onto the base branch individually.

### GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

#### Source

GitHub Pages is currently disabled. You must first add content to your repository before you can publish a GitHub Pages site. [Learn more.](#)

None ▾

Save

#### Theme chooser

Select a theme to build your site with a Jekyll theme using the `master` branch. [Learn more.](#)
